Re: Testimonial for PFI-Security

Dear Sirs,

Peter was very supportive to myself as Project Lead and our IT Contractor in the recent success we enjoyed in achieving accreditation to the Cyber Essentials Plus Scheme.

His assistance throughout the entire process was faultless and his diligence in establishing workable solutions to the challenges that we encountered was first class.

The certificate was issued at the end of July 2016 to meet our original deadline following a project start at the end January 2016; Peter supported the process throughout this period by guiding us through the actions with regular review meetings.

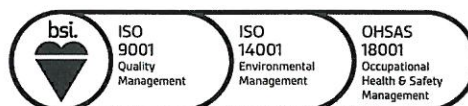

Post award the revised procedures that have been introduced are proving to be robust and we have had no negative feedback from the team to the changes in working practices that we established.

I would have no reservations in recommending Peter to support you in your own Cyber Essentials Plus initiative.

Yours Faithfully
